

THERM·O·COMFORT

CELLULOSE FIBRE INSULATION

Not all companies are the same!

Choosing the right company is as tough as choosing the right insulation. The cost of removing and replacing a poor insulation product is difficult and often prohibitively expensive. Not only do you want a product you can count on but a company that stands behind their products with a comprehensive warranty. Therm-O-Comfort is dedicated to addressing the issues most important to building owners, designers, contractors and occupants. Quality, service, flexibility, environmental responsibility and health and safety are the objectives we share with you.

QUALITY – We have a heritage of and a commitment to unsurpassed quality. Therm-O-Comfort operates under the ISO 9001 quality assurance model and through this program, we strive to continually improve our operation and products. We operate a state of the art manufacturing facility equipped with the most advanced process controls in the industry. This ensures you will receive the best, safest and most reliable product.

SERVICE – Therm-O-Comfort is sensitive to the needs of your business. We understand that it is difficult to plan and manage inventory and large projects can often require more material than anticipated. Whether it is next day on-time delivery, troubleshooting equipment issues, or responding to technical inquiries, Therm-O-Comfort responds in a professional, efficient and timely manner.

FLEXIBILITY – Therm-O-Comfort understands that customers are not all the same. Therm-O-Comfort is a regional company which has the flexibility to provide products and services specific to the needs of your business and markets. We strive towards the individual attention required to ensure we are in touch with your needs and tailor services according to them.

ENVIRONMENTALLY RESPONSIBLE – At Therm-O-Comfort, we are more than insulation. We are energy conservation. Not only do our products reduce energy consumption and dependence on fossil fuels, but they also help reduce the production of green-house gases and global warming. We are not only concerned about providing comfort and cost savings but also maintaining the health of our natural environment.

HEALTH & SAFETY – It has always been our priority. Our products are formulated with naturally occurring fibres and minerals that are stable and do not to release VOC emissions. They are designed to promote the health and well-being of our employees, contractors who install our products, and the building occupants who live and work around our products every day.

Who are our customers?

Therm-O-Comfort offers its products through an extensive network of contractors, retailers and manufactured home builders. Therm-O-Comfort takes pride in supplying outstanding products and designing a comprehensive sales program to make your business succeed. Being a regional company, we understand the needs of small to medium sized business owners. Not only are we flexible, but we have the knowledge and resources necessary to ensure your business succeeds.

Who uses our products?

Homeowners

Let Therm-O-Comfort assist you in your next building or renovation project. Whether it is topping up your attic or sound proofing the floor above your basement, Therm-O-Comfort can provide you with the right advice or installer referral to get the job done properly. Not only can we provide you with the resources to make smart decisions about your insulation needs, but we can provide detailed project instructions and installation tips.

Builders

Therm-O-Comfort ensures quality within your company's commitment to building a more sustainable, energy efficient and healthier home as well as offering a cost competitive product. Cellulose fibre insulation is the "Natural Choice". Additionally, our products are specially treated and have superior fire resistance ratings. The treatment also has the added benefits of protecting the structure and indoor environment from harmful agents such as mold, mildew and insects.

Architects and Engineers

When it comes to specifying insulation, you need a reliable product, backed by an established company with a proven track record. Cellulose insulation has been in use longer than any other insulation and has proven itself to be a durable and reliable material which performs over a wide range of extreme conditions. Therm-O-Comfort is a company with a reputable and stable background and has the resources to back its products.

In business since 1977, Therm-O-Comfort provides a comprehensive warranty with all products and can provide you with all applicable technical information, product information, submittal forms and job references. Our products are ideal for sustainable and green building projects that promote healthy living.
